

MOCK SPRINT REQUIREMENTS

Group 10 – Mock Sprint

Group 10

Viet Nguyen

I. Functional Requirements

1. Restyling Login Page

FR-01: Existing session behaviours (including cookie storage) shall remain unchanged during and after the restyle.

FR-02: Existing authentication logic shall remain unchanged during and after the restyle.

FR-03: The restyled login page shall redirect the user to Team Page after a successful authentication.

FR-04: The login page shall display an error message using updated design when user enters invalid credentials.

2. Team Page Implementation

FR-01: The Team Page shall display team member profiles containing four core content fields: Name, Photo, Role, and Blurb.

FR-02: The Name, Role, Blurb shall be mandatory fields for every team member card.

FR-03: The system shall allow Photo field as an optional field for every team member card.

FR-04: The Name field shall support plain text up to a maximum limit of 80 characters.

FR-05: The Role field shall support 4 specified roles consisting of Project Manager (PM), Business Analyst (BA), UX/UI Designer (UX), Developer (Dev).

FR-06: The Blurb shall support plain text up to a maximum limit of 500 characters.

II. Non-functional Requirements

NFR-01: The updated UI shall be visually and functionally consistent across current versions of Chrome, Safari, Firefox, and Edge.

NFR-02: All interactive elements on the login page and team page (inputs, buttons, expanders) shall be fully accessible via keyboard navigation with visible focus indicators.

III. User Stories and Acceptance Criteria

1. Restyling Login Page

User Story

As a returning user,

I want to access an updated, visually restyled login page,

So that my sign-in experience matches the modernised brand design without affecting how I log in.

Acceptance Criteria

Scenario: Valid login with restyled UI

Given a user navigates to the restyled login page

When they submit valid credentials

Then the system shall redirect them to Team Page.

Scenario: Failed login attempt

Given a user enters incorrect credentials on the restyled login page
When they click the login button
Then the system displays the existing error message using updated UI alert styling.

2. Team Page Implementation

User Story

As a member of Group 10,
I want to view my team member profile cards containing a photo, name, role and blurb
so that I can easily learn more about my teammates.

Acceptance Criteria

Scenario: View team members' detail

Given a user successfully logged on the website

When the user is redirected to the Team Page

Then the system shall display team member cards containing a photo, name, role and blurb.

Scenario: A member is missing profile photo

Given a member has no profile photo uploaded

When the profile card is displayed

Then the system shall display a default placeholder avatar

And the card layout and alignment shall remain unchanged.

Scenario: A member has blurb text longer than 250 characters.

Given a member has a long blurb text between 251 and 500 characters

When the page displays member cards

Then the card truncates the text at 250 characters with an ellipsis (...)

And the card shall display an inline "Read More" button to expand the full bio text.

Scenario: A member has their name longer than the standard card width

Given a member name exceed standard card container width

When the page displays member cards

Then the card shall wrap the name to a maximum of 2 lines

And the card shall remain the same height, alignment and layout as others.
